iOS Security and Privacy Workshop

Course Summary

Description

Whether a company is deep into its deployment of iOS or just beginning the journey, security and privacy come up in every deployment conversation. In this four-hour workshop, participants learn about security and privacy technologies that are built into iOS so they're ready to discuss why the Apple platform is the best choice for business mobility.

Objectives

By the end of this course, students will be able to:

- Identify the security and privacy posture for a device after the completion of Setup Assistant
- Explain the importance of a device passcode in protecting user and company data
- Describe the built-in features of iOS that help keep user and company data separate
- Identify strategies to ensure that data is encrypted when sent over networks to trusted hosts
- Respond to misconceptions related to iOS security and privacy
- Help plan the security and privacy strategy for a successful iOS deployment

Audience

This course is designed for IT professionals who are responsible for integrating iOS devices into an organization's existing network, and for technical sales professionals who help customers choose iOS devices.

Prerequisites

There are no prerequisites for this course.

Duration

Five days
