

HCISPP Certification Prep Course

Course Summary

Description

In this course, you will hone your knowledge and skills related to healthcare security and privacy, and also helps you prepare for the (ISC)2 HCISPP exam. HCISPPs provide the front-line defense in protecting health information.

As the healthcare industry faces increasing challenges to keeping personal health information protected, there is a growing need to ensure knowledgeable and credentialed security and privacy practitioners are in place to protect this sensitive information.

You will learn legal and regulatory requirements and security privacy concept principles regarding healthcare information. It is important to understand and know how organizations manage information risk through risk assessment practices and procedures.

This course is your one source for exam preparation that includes:

- Official (ISC)2 Guide to the HCISPP Common Body of Knowledge (CBK)
- Official (ISC)2 HCISPP Training Handbook
- Official (ISC)2 HCISPP Flash Cards
- HCISPP Certification Exam Voucher

Objectives

After taking this course, students will be able to understand the six domains required to pass the HCISPP exam:

- Healthcare Industry
- Regulatory Environment
- Privacy and Security in Healthcare
- Information Governance and Risk Management
- Information Risk Assessment
- Third-party Risk Management

Topics

- Healthcare Industry
- Regulatory Environment
