

COBIT 2019 Bridge Certificate Program

Course Summary

Description

This course offers an express route to becoming a COBIT 2019 certified professional. Students will gain the knowledge required to understand the differences introduced with COBIT 2019 Foundation certificate in order to pass the COBIT 2019 Bridge exam.

This focused bridge training and study skips over the core elements you are already familiar with having studied for the COBIT 5 Foundation certificate. Training for the Bridge exam means you only have to study the elements new to the latest COBIT framework.

Program Material

The program includes the following material:

- Digital copy of the learner materials, study-aids and sample exam
- Certification exam voucher

Topics

Students can expect to learn:

- The comparisons between the COBIT 5 and COBIT 2019 frameworks
- The updated COBIT principles for establishing an effective governance system framework:
 - Governance and management objectives
 - Components of the governance system
 - Focus areas
 - Design factors
- The updated COBIT goals cascade and how it compares with COBIT 5
- Designing a tailored governance system for an organization using COBIT
- The key points of the COBIT business case
- How COBIT aligns with other applicable frameworks, standards and bodies of knowledge

Audience

The target group for this program is previous COBIT 5 Foundation certificate holders.

Prerequisites

Students must be a current COBIT 5 Foundation certificate holder. The COBIT 5 Foundation certificate must be issued by one of ISACAs accreditation bodies (APMG or PeopleCert.)

Duration

One days
