

CSF-202: Deploy and Manage Citrix Content Collaboration

Course Summary

Description

In this e-Learning course, you will learn about enterprise file sharing and synchronization with Citrix Content Collaboration. You will gain the skills and understanding needed to configure and manage your Citrix Content Collaboration environment, including implementation of StorageZones and Citrix Virtual Apps and Desktop clients. Additionally, explore your control plane and data storage options, end-user management, and client deployments on Windows physical and virtual desktops.

This course will give you an understanding of Content Collaboration administrative responsibilities and teach you how to navigate the administrative console for facilitated deployment and file sharing success. This course is designed for IT professionals with little Citrix Content Collaboration experience.

Objectives

At the end of this course, students will be able to:

- Learn about the Citrix Content Collaboration solution, its use cases, understand the components of the Citrix Control Plane, Citrix Collaboration service.
- Understand the data tier and security protocols.
- Learn about the different StorageZone deployments available, how to install and configure StorageZones, and explore common configuration issues.
- Learn the basic functionalities available for management and administration, sharing and requesting functionalities, as well as administrative settings and tools available to customize your environment.
- Learn how to install Citrix Files, and Citrix Files tools available and how to troubleshoot those tools.
- Learn about single sign on with Citrix Content Collaboration, the user management tool, and the traffic flow when Endpoint Management is configured with Citrix Content Collaboration.
- Understanding Citrix Content Collaboration
