

Overview of STigS

Course Summary

Description

Employees will learn a conceptual understanding of Security Technical Implementation Guides as well as real-world implementation instruction. This training is to fill Mission Critical gaps as identified and vetted through the IT Skill Gap Mitigation analysis process.

Topics

AM

- Short presentation on RMF and CSF the drivers for (STIG) Security Technical Guides

PM

- What is a STig
- How is it created
- What are the elements of a STig
- What are SCAP tools
- How STigS are used

Audience

This course is designed for anyone who is interested in security technical implementation guides.

Prerequisites

There are no prerequisites for this course.

Duration

One day
